## We are looking for an experienced and talented Senior Integration Developer to join our team at The Royal Marsden NHS Foundation Trust

The Royal Marsden has an ambitious Digital Services strategy involving implementation of major enterprise solutions over the period 2020-2024. These include a new Digital Health Record in replacement of its current EPR solution, a new data warehouse, and new solutions supporting digital diagnostic services and wider information sharing with our partner healthcare providers.

We are looking for an experienced and talented Senior Integration Developer to join the team at this exciting time. The core focus will be integration and interoperability as your specialist technical field. You will have a successful track record of technical delivery using best practice and appropriate solution architectures. A background in healthcare application development is desirable.
