ERROR : Blocked a frame with origin "http://localhost:52773" from accessing a cross-origin frame

Hi,

After cloning "http://github.com/intersystems/Samples-Integration-RedLights" sample code I imported sample production from /home/project/Samples-Integration-RedLights/data/EndStateProduction.xml file to my local system.

Now I am getting the error "ERROR #5021: Directory '\home\project\shared\Samples-Integration-RedLights\data\SampleFiles\' does not exist." in my service.

While modifying the Directory path I am getting below error :

"A JavaScript exception was caught in function function SecurityError" : Blocked a frame with origin "http://localhost:52773" from accessing a cross-origin frame."

Thanks
