Challenge on Global Masters: Try HealthShare Message Transformation Services

Hey Community,

We are really looking for your feedback on a new offering - [HealthShare Message Transformation Services](#). It went live on [AWS Marketplace](#) where you can try it for free!

We launched a [related challenge](#) on GM where you can get points for giving it a try and a "thank you" prize to everyone who leaves feedback in comments to [this post](#).

If you are not GM member, you can do following and also require your "thank you" prize:

- #1 Try it out - [here's a step-by-step guide](#). Would be so much value for us if you test it with your own HL7!
- #2 Send me a screenshot of your status page for a pipeline showing both your username and a Live pipeline that has processed at least one message. Screenshot should look like this:

HEALTHSHARE MESSAGE TRANSFORMATION SERVICES | DemoPipeline-Unencrypt User: Benjamin Spead

DemoPipeline-Unencrypt Transformation Pipeline

[Statistics](#) [Properties](#)

Pipeline Status ✔ Live

Statistics	
Files processed	1
Files remaining	0
Inbound messages	1
Messages successfully processed from files	1
Invalid messages	0
FHIR resources created	8

#3 What worked well? Any issues? Will you use it? Leave feedback in the comments [to this post](#).

We are VERY interested in seeing people try this service and provide us with specific feedback on how it might bring value to them and their organization.

Looking forward to see your feedback!
