Cleaning up null elements from JSON payload

Hello All,

I am just wondering if there is any inbuilt function or utility available in IRIS to clean up "null" elements from JSON e.g. I want to remove "null" elements from payload below before I do any processing with it.

```
{  
  recipients: [  
    { "name": "Utsavi", "email": "utsavi@gmail.com" },  
    { "name": "Utsavi 1", "email": "utsavi1@gmail.com" },  
    null, null  
  ],  
  content: [null, { "title": "Test.pdf", "data": "ygwehfbnwfbhew" } ]  
}
```

Thanks & Regards,

Utsavi
