InterSystems Partner Directory is Available!

Hey Developers,

We are excited to announce the launch of the [InterSystems Partner Directory](#)!

This is the place to go to find commercial [services](#) and [solutions](#) built on InterSystems products.

Why InterSystems Partner Directory?

Every day, we receive questions like these:

- Are there any ERP solutions built on InterSystems technology?
- I live in Sweden—how can I get trained with InterSystems?
- Does InterSystems have any implementation partners in France?

Whether our customers look for help building a solution, for a trusted consulting source, for assistance with an implementation project, or for some extra training, they can use the Partner Directory to establish a relationship with the company that's right for them.

If your company is an InterSystems partner that provides:

- Implementation, consulting, or training services related to InterSystems technology,
- and/or solutions built with or for InterSystems products,

We welcome you to publish your listing and join the Partner Directory.

Check it out and share it with your colleagues!
