Video: Visual Studio Code for ObjectScript: Choosing an IDE/Source Code Combination

Hey Developers,

New video is already on InterSystems Developers YouTube:

Visual Studio Code for ObjectScript: Choosing an IDE/Source Code Combination

Learn about the launch of the InterSystems Objectscript Extension v1.0 for Visual Studio Code, and see how development teams can choose a suitable IDE and source-control approach for their projects. Learn the differences between shared and private development instances, and between server-side and client-side source control hooks, critical in choosing the right IDE approach.

⬇ VSCode-ObjectScript on Open Exchange app gallery

Presenter: @Ben Spead, Manager - Application Services, InterSystems

Stay tuned!
