French Stream On InterSystems Technologies

All French-speaking developers are friendly invited to follow a stream in the form of a journal.

Every first Thursday of the month at 12:00 (Paris time), we organize a 30-45 minutes stream on Youtube with the following format :

- News on technologies around InterSystems.

- A section called "Did you know it?" (tips and tricks on IRIS)
- A "dossier", where we develop a subject (example: How language gateway works).
- And we end the program with an Interview of an french developer
