Installing new fonts for FOP

I'm using FOP 1.1 for ZEN reports and would like to install fonts within the Windows/Fonts directory.

I added the xml tags in fop.xconf but so far I have been unable to get the correct font.

```
<renderers>
  <renderer mime="application/pdf">

 <fonts>
  <directory>c:\windows\fonts</directory>
   <!-- automatically detect operating system installed fonts -->
  <auto-detect/>
  </fonts>

</renderer>

</renderers>
```

Any advice would be appreciated.
