InterSystems IRIS Java projections compiler doesn't listen to the -d flag

We found out recently that when compiling an objectscript class that has a java projection, using the -d flag, it ignores it for the projection part:

```
USER>set sc = $SYSTEM.OBJ.Compile("Tools.Proj","ck-d")
```

```
Generating Java Binding: C:\InterSystems\IRIS20211\devuser\java\USER\Tools\Proj.java
```

After talking with intersystems luckily they've provided a solution that will be included in the next release:

```
%SYS>set sc = $SYSTEM.OBJ.Compile("Tools.Proj","ck-d")
```

```
%SYS>
```
