Insert memo field via ODBC in PHP

Our company is using Cache FDBMS for Medtrak.

I am trying to insert a record with the following data types : date, time, string and memo field (multiline). The SQL insert/update works fine without the memo field.

Here's my SQL statement

Insert into MRSUB (MRSubDate,MRSUBTime,MRSUBUpdate,MRSUBDesc) values(:DTE, :time, :use, :remarks)

Based on FDBMS docs. MRSUBDesc is a multiline/memo data type

Hope somebody can help. Thanks
