How to change valid Date range to a valid Time range

I am trying to convert a valid date range (Previous Day - Current Day) to a valid date/time range (-15 mins from current date/time to current date/time) for a Task to run (Format needs to be YYYY-MM-DD hh:mm:ss)

Code being used currently for date range is

```
set previousDay=$zdatetime($horolog-1,3)
set currentDay=$zdatetime($horolog-0,3)
```

Can anyone help?
