# Do you use InterSystems IRIS interoperability tools? We need your input!

Hello All,

InterSystems Certification has redesigned their IRIS Integration certification exam, and we again need input from our community to help validate the topics. Here's your chance to have your say in the knowledge, skills, and abilities that a certified InterSystems IRIS Integration Specialist should possess. And, yes, we'd like to hear from you Ensemble users as well!

Here's the exam title and the definition:

InterSystems IRIS Integration Specialist

An IT professional who:

- designs and builds integrations for various industries, and
- manages and configures productions using InterSystems IRIS interoperability tools.

So, how can you help? If you have 30-45 minutes to fill out a task survey, you can help us rate each exam topic based on your experience.

Interested? Please contact the Certification Team at [certification@intersystems.com](mailto:certification@intersystems.com).

Thank you!
Jiahao Song, Certification Exam Developer, InterSystems
