Video: Fast & Efficient Provisioning & Testing with InterSystems Cloud Manager

Hi Community,

New video is already on [InterSystems Developers YouTube](#):

[Fast & Efficient Provisioning & Testing with InterSystems Cloud Manager](#)

See how the powerful InterSystems Cloud Manager tool supports cloud deployment — both with and without containers — for continuous testing and deployment phases. The Cloud Manager can be used for both pre-production and production situations, as it natively implements InterSystems best practices. Cloud Manager leverages an intuitive declarative format for easy cloud and on-premises deployment of InterSystems IRIS clusters configurations.

Presenter: [@Steve Pisani](#), Senior Solution Architect, InterSystems

Enjoy and stay tuned!
