ENS ,ENSLIB Tables not able to access from my namespace

```
Class abc.abcmh [ DdlAllowed ]
{ ClassMethod FetchMsgCount() As %Integer
{
    set msgCount=-1
    &sql(SELECT count(ID) INTO :msgCount FROM Ens.MessageHeader)
    If SQLCODE=0 Quit msgCount
    Quit SQLCODE
}
```

This class method always giving -30 , means Table does not exist.

note: my namespace extends %sys
