Multiple DELETE statements in a single query in Cache Monitr

I need to execute multiple DELETE statements in a single query like this

```
DELETE FROM TableName WHERE ID = 2;  
DELETE FROM TableName WHERE ID = 3;  
DELETE FROM TableName WHERE ID = 4;
```

However It does not work when there're more than 2 statements and gives me an error

Expected FROM found WHERE^DELETE FROM TableName WHERE

Using IN is not an option.
