Warning - 2021.1 Community Edition license is expiring soon - replacement is available

It's come to our attention that the built-in license in the InterSystems IRIS and IRIS for Health 2021.1 Community Edition release is incorrectly set to expire on October 30, 2021.

There is no impact to any production versions (the Community Edition is for development purposes), but developers will find that their instances stop running and should replace them with new ones. For cases where replacing them is an issue, we have provided an override key.

I apologize for any inconvenience this may cause.

== replacement builds

Standard kits and containers have been posted on the WRC software distribution site. Look for version 2021.1 build 215.3.

New container builds with an extended key are now available from the InterSystems Container Registry. You can pull the new images as follows:

docker pull containers.intersystems.com/intersystems/iris-community:2021.1.0.215.3

docker pull containers.intersystems.com/intersystems/iris-community-arm64:2021.1.0.215.3

docker pull containers.intersystems.com/intersystems/irishealth-community:2021.1.0.215.3

docker pull containers.intersystems.com/intersystems/irishealth-community-arm64:2021.1.0.215.3

InterSystems Containers Docker Hub have been updated.

We'll update this post the Community Edition cloud marketplace instances on AWS, Azure, and GCP are updated.
