CCR Tier 1 Virtual Training November 30 - December 2

I'm happy to announce that there is space available in a training on the InterSystems Change Control Record (CCR) application at the end of November. Class is open to InterSystems employees, partners, and customers that use the InterSystems CCR application (ccr.intersystems.com).

Capacity is limited, so please register now!

Course Name: InterSystems Change Control: Tier 1 Basics

When: November 30, 2021 – December 2, 2021, 9am to 5pm US Eastern Time

Where: Live, instructor-led virtual classroom with hands on exercises. You will receive connection details shortly before class.

Cost: No cost for qualified customers and partners

This course is applicable to all Tier 1 users of the CCR application and will not cover Tier 2 specific material for InterSystems TrakCare® users.

This course – consisting of 3 days – teaches CCR users how to safely and efficiently progress code changes as well as changes made to interoperability components such as productions and data transformations. By the end of training, learners will be able to leverage the workflow and documentation tools, use CCR Transport to move changes, follow best practices to prevent crises, and debug common errors.
