Start learning about Embedded Python!

The banner features the InterSystems logo and 'VIRTUAL SUMMIT 2021' text in the top left. Below this, the dates 'OCTOBER 26 - 29' are displayed. The main heading 'FOCUS SESSIONS' is followed by 'InterSystems IRIS with Embedded Python'. A list of three sessions is provided: 'Introduction to Embedded Python (DPPY01)', 'Embedded Python for ObjectScript Developers (DPPY02)', and 'Embedded Python with Interoperability (DPPY03)'. A prominent orange button labeled 'Register Now' is positioned below the list. The background is a dark teal with abstract, colorful, flowing lines on the right side.

InterSystems®
VIRTUAL SUMMIT 2021
OCTOBER 26 - 29

FOCUS SESSIONS
InterSystems IRIS with Embedded Python

- Introduction to Embedded Python (DPPY01)
- Embedded Python for ObjectScript Developers (DPPY02)
- Embedded Python with Interoperability (DPPY03)

Register Now

Welcome to day 3 of Virtual Summit 2021! We have incredible content available to you this year and I'd just like to bring your attention to the 4(!) sessions that we have on Embedded Python.

- [Introduction to Embedded Python](#) - What is Embedded Python and Why is it awesome
- [Embedded Python for ObjectScript developers](#) - A technical deep dive into using Python and ObjectScript together inside IRIS
- [Embedded Python with Interoperability](#) - Covers how to use Embedded Python to create your own custom interoperability components.
- [Using Python with Visual Studio Code](#) - A fantastic session that covers building a real-world application that uses Embedded Python that demonstrates how easy VS Code makes Python development
