Cloudflare and CSP

Hi,

Has anyone experienced any issues when using Cloudflare in front of a csp application?

I keep getting 502 errors when Cloudflare is active?

Strangely, the SMP works but only if I remove the trailing question mark from the url but it doesn't resolve the issue when I try any other csp application URL's.

#CSP #Caché
Product version: Caché 2017.1
$ZV: Cache for Windows (x86-64) 2017.2 (Build 744U) Fri Sep 29 2017 10:58:27 EDT
