How to get the insert ID in SQL?

I want to INSERT a record in a database using JDBC in OBJECTSCRIPT. At the same time, I want to obtain the insert ID. Is there a way to achieve this using the SQL Outbound adapter?

My code is something like this now:

Property Adapter As EnsLib.SQL.OutboundAdapter;

set sql = " INSERT INTO PrenotazioniCUP "_
  " (ID, cf
  " VALUES (SEQTAB.NextVal, ?) "
set status = ..Adapter.ExecuteUpdate(.rs, sql, pRequest.cfAssistito)
