ERROR #9406

I'm trying to send a POST request to my REST API and I'm getting this error and most likely due the lack of experience, I have no idea how to fix this issue:

```
"error": "ERROR #9406: Unexpected format for value of field, AlertText, using class base mapping",
```

```
  "id": "JSONImportError",
  "params": [
    "AlertText",
    "class base"
  ]
```

Am I missing something from my string definition?

Defined below as:

```
Class User.RESTComponents Extends (%Persistent, %JSON.Adaptor, %Populate)
```

```
{
```

```
Property AlertText As %String;
```

Here is my POST -method:

```
/// Creates a new User.RESTComponents item
```

```
ClassMethod POSTService() As %Status
```

```
{
```

```
  #dim tSC As %Status = $$$OK
```

```
  #dim e As %Exception.AbstractException
```

```
  Set test = ##class(User.RESTComponents).%New()
```

```
  Set data = %request.Content
```

```
  $$$TOE(tSC,test.%JSONImport(data))
```

```
  $$$TOE(tSC,test.%Save())
```

```
Set %response.Status = 204
```

```
Set %response.ContentType = ..#CONTENTTYPEJSON
```

```
//d data.%ToJSON()
```

```
Do test.%JSONExport()
```

```
Quit tSC
```

```
}
```
