ASTM Ensemble Interfacing

Dear All

I am trying to interface LAB instruments with LAB System using ASTM over TCP. I read the documentation [here](#). But I can't understand how to connect instrument and LAB system in same port, please see the screenshot of interface below. Please help.

Details:

- For Service I use "EnsLib.EDI.ASTM.Service.TCPService" class.
- For Process I use "EnsLib.MsgRouter.VDocRoutingEngine" class.
- For Operation I use "EnsLib.EDI.ASTM.Operation.TCPOperation" class.
