Getting SCOPEIDENTITY() from SQL SERVER

Hi,

In a Business Operation i have the following code.

I need the identity of the latest row inserted in a table in MSSQL.

i Have the following code:

```
-----  
set insertmaster= "INSERT INTO dbo.dataMasterArchive(deviceToPatientLogID) values (?)"  
  
set tSC = ..Adapter.ExecuteNonQuery(.nrows1,insertmaster,pRequest.deviceToPatientLogID)  
$$$$ThrowOnError(tSC)  
  
set sql ="SELECT SCOPEIDENTITY()"  
set tSC = ..Adapter.ExecuteQuery(.tResult,sql)  
$$$$ThrowOnError(tSC)  
  
set maxID = tResult.Get(1)  
  
-----
```

the result of maxID after the above is NULL.

what am i doing wrong?.

Thanks
