InterSystems Package Manager ZPM 0.3.2 release

A new release of ZPM has been published - ZPM 0.3.2.

New in this release:

- Various changes in the output command of help
- Changes in colors in the outputs
- Added an ability to add more repo types
- Added an ability to specify a post-installation message, with AfterInstallMessage tag in module.xml
- Added variable ${webroot}, which refers to url with host and port where the internal web-server is available
- Fixed issue when during install if no module was specified (issue #243)
- Fixed issue with uppercased FileCopy resource
- Some other minor bugfixes
