Latest IS Docker Image unable to locate HL7 service ?

I am a newb and I can't seem to find the HL7 Service name down below

BUSINESS SERVICE WIZARD
Add a new Business Service to this Production.

All Services | X12 Input | Business Metric

Service Class	Service Name	Display Category	Comment	Enable Now
	Ens.Activity.Service.TCPCounted			
	Ens.Alerting.AlertMonitor			
	Ens.BusinessMetric			
	Ens.Enterprise.MonitorService			
	Ens.Enterprise.MsgBank.TCPService			
	Ens.ManagerService			
	Ens.MonitorService			
	Ens.ProductionMonitorService			
	Ens.ScheduleService			
	EnsLib.Background.Service			
	EnsLib.DotNetGateway.Service			
	EnsLib.EDI.EDIFACT.Service.FTPService			
	EnsLib.EDI.EDIFACT.Service.FileService			

Use this form to add a new business service to the production.
For help with any setting in this form, hover the cursor over the setting name.

Class Name

EnsLib.EDI.X12.Service.FileService

Description

Adapter Class Name

EnsLib.File.InboundAdapter

Adapter Description

Finds files in a FilePath directory and submits all that match a FileSpec wildcard to an associated BusinessService for processing
