## Installing IRIS on Apple Silicon M1 MacBook

Does anybody know if it should be possible to install IRIS for Health on a MacBook with Apple M1 inside? The install distribution works on an Intel based MacBook but when I try on new MacBook (with Apple M1) I get the following response:

The installer can't find a platform in this distribution supported by your system.

Contact InterSystems support.

[#Apple macOS #InterSystems IRIS for Health](#)

Product version: IRIS 2021.1

\$ZV: IRISHealth-2021.1.0.215.0
