EnsLib.File.PassthroughService replaces spaces with underscores in file names.

EnsLib.File.PassthroughService replaces spaces with underscores in filenames.

Example:

File name of GWUH_9999_GWUHMRN_9999_99999_Chart Note_999999.pdf lands in receiving folder as GWUH_9999_GWUHMRN_9999_99999_Chart_Note_999999.pdf.

The same behavior is **occurring** when the file is saved to the archive folder.

Has anyone encountered this issue and devised a fix or workaround?
