[Progressive Minds / Creative Solutions](#)) as Integration Engineer as contractor for Department of Veterans Affairs.

I worked with InterSystems technologies since 2001. I started learning Cache Objects, Cache Server Pages, and Cache Object Script. In 2018 I had an opportunity to work on Health Connect. The first project I worked on was ingesting claims files and inserting data into Oracle database tables. Lately I have been working in AWS redesigning a different Health Connect solution to run in containers working with Elastic Container Service and lately specifically Fargate.

I became a grandfather last year. I enjoy my work, listening to music, as well as watching soccer games".
