## Purging particular Interface logs in Healthshare Ensemble

I am working in InterSystems Healthshare product.

I want to clear the message logs from a particular interface (Service,process,operation).

In intersystems we have the option to purge the data for all interfaces for the corresponding time but I want to clear the data logs for particular interface only.

Please let me know how to approach this scenario.

[#Ensemble #HealthShare](#)

Product version: HealthShare 2020.1
