## Can you have a Parameterizable LOCATION for a %Stream.FileCharacterGzip property?

I want to make the LOCATION for a %Stream.FileCharacterGzip property we have in a class parameterisable (as in stored in a global), so it can be different for different customers. Is that possible? I've tried doing it a few different ways:

Creating a parameter

```
Parameter STREAMLOC = {^websystem("auditstream-location")};
```

then I tried to reference that in the

```
Property HTMLZIPDoc As %Stream.FileCharacterGzip(LOCATION = ..#STREAMLOC);
```

but the compiler doesn't like that.

I've also tried adding something to %OnOpen and %OnNew:

```
Method %OnOpen() As %Status [ Private, ServerOnly = 1 ]
```

```
{  
    S ..HTMLZIPDoc.%Location=^websystem("auditstream-ziplocation")  
    Quit $$$OK  
}
```

```
Method %OnNew() As %Status [ Private, ServerOnly = 1 ]
```

```
{  
    S ..HTMLZIPDoc.%Location=^websystem("auditstream-ziplocation")  
    Quit $$$OK  
}
```

but that didn't work either. Is it possible?
