Developer Community Release, December 2021

Hey Community,

Day by day, our team makes the DC site a better place for InterSystems developers. This release will show how we've improved the Developer Community recently.

The key features:

- User profile editing
- Contest page for Tech Article Contests
- Word & character counter

Learn more about our new features below.

User profile editing

Completely new design! Now it's easier to add information to your profile!

Contact info visibility

Show my public email and phone number on profile page for:

- ☐ Everyone
- ☒ Connected users
- ☐ Nobody

Direct messages

☒ Enable direct messages

Disabling direct messages prevents you from sending or receiving messages from other users.

Receive email notifications for new direct messages:

- ☐ Never
- ☒ Every time I receive a message
- ☐ Only for a new conversation
- ☐ Only once per conversation until I read the messages

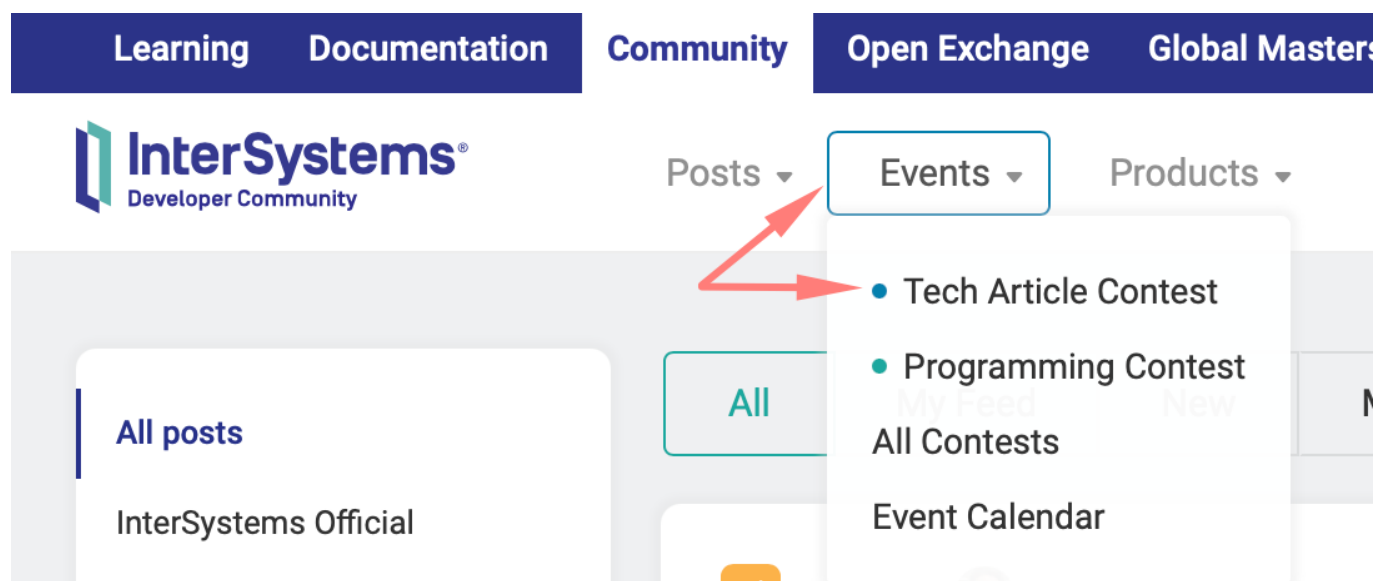

Contest page for Tech Article Contests

As you already know, in 2021, we launched a new contest for InterSystems Community members called Tech Article Contest.

For our technical article writing competitions, we've created a completely new design and functionality of the Contest page:

- [1st Tech Article Contest](#)
- [2nd Tech Article Contest](#)

You can easily find this page in the Events section of the top menu:

We highlight Events in the top menu to keep you up to date with all the hot DC events. A dot is a marker of active competition.

On the page of an active contest, you can easily create an article in one click using the "Join the contest" button. Contest rules are displayed on the left of the page; all participants – on the right in the feed.

InterSystems Tech Article Contest: 🎄 Christmas Edition 🎄

Welcome to the 2nd InterSystems technical article writing competition! Write an article on any topic related to InterSystems technology from November 25 to December 25, 2021. [Details here.](#)

Requirements

! Any article written during the contest period and satisfying the requirements below will automatically enter the competition:

- The article must be related to InterSystems technology
- The article must be in English
- The article must be 100% new (it can be a continuation of an existing article)
- The article should not be plagiarized or translated (translations of your own DC articles from another language are allowed)
- Article size: >1,000 characters (links are not counted towards character limit)

Article **Sergey Mikhailenko** · Nov 29 · 2m read Likes: 13

Deploying solutions without source code from ZPM

I recently published the "apmsw-docbook" module for deploying the solution not by individual programs, but by the entire database. This solution allows you to deploy a project without source codes.

Having received feedback, I decided to improve it significantly. Replaced zip archive with tgz, which will allow not using external system-dependent archivers.

Article **Henry Pereira** · Dec 1 · 5m read Likes: 13

Data anonymization, introducing iris-Disguise

On each article, you see a label with the number of likes. After the end of the contest, it freezes, showing the number of likes on the end date (note: this does not limit the ability to continue to like this or that article).

A label with Experts votes appears only after the end of the contest.

We've implemented the word & character counter in our DC editor so that you can easily track the amount of content in your post.

When you type any text on the post creation page, DC Editor reads all words and characters and automatically displays them in the lower right corner.

Note: Counter works only for WYSIWYG format.

Hope you enjoy our updates!

Feel free to submit [new requests for improvements and bug reports](#). Or post your suggestions in the comments to this post.

Enjoy and stay tuned!
