How send request without urlencode params in URI?

Hello!

I send request:

```
set hr=##class(%Net.HttpRequest).%New()  
set hr.Server = "server.com"  
set hr.Location = "method?param=value"  
do hr.EntityBody.Write("{ \"name\": \"value\" }")  
  
set tSC=hr.Send("POST")
```

But when request incoming to server.com URI = "method%3Fparam%3Dvalue".

How I can disable urlencode params in URI, so that the URI remains "method?param=value"?
