Last call for feedback on the exam design of our IRIS System Administration certification exam

Hello Everyone,

In October 2021 we asked for input from the IRIS community regarding exam topics for our InterSystems IRIS System Administration exam. We will close the window for providing feedback on the exam topics on Wednesday, January 12, 2022. Thus, if you would like to have your say in what topics are covered on the exam, this is your last chance!

Extra perk for US-based, non-InterSystems employees: To show our appreciation for helping us validate our exam design, we will offer the first 20 volunteers that complete the survey a $50 gift card. The gift card is a [Tango Card](#) that can be redeemed at any number of online retailers (note: the gift cards will not be distributed until Wednesday, January 12th).

Here's the exam title and the definition:

InterSystems IRIS System Administration Specialist

An IT Professional with a minimum of six months full-time experience performing system administration duties in InterSystems IRIS. Specifically, the **IRIS System Administration Specialist** should have a minimum of six months experience with:

- installing, managing, and monitoring InterSystems IRIS environments, and
- ensuring data security, integrity, and high availability.

So, how can you help? If you have 30-45 minutes to fill out a task survey, you can help us rate each exam topic based on your experience.

Interested? Please contact the Certification Team at certification@intersystems.com.

Thank you!

Shane Nowack, Certification Exam Developer, InterSystems
