Unable to export entire Production

We are migrating from AIX to Linux and part of our testing is trying to figure the best method to migrate the code. I am trying to export an entire Production, however I keep running into an error...

Error generating export list for production osuwmc.TestClin and all items may not be listed.
ERROR #5002: Cache error: <CLASS DOES NOT
*EXIST>zgetRecordandComplexMapClasses+34^Ens.Config.Production.1 *(No name)*

I went through any Complex Record Maps, and recompiled them but I am still getting the same error

Does anyone know how I can track down this error and the culprit?

Thanks

Scott Roth
