REST APIs with Intersystems technolgy

Hello developers, I'm a newbie to Intersystems technologies and I started to work with Caché and Ensemble, and to be more specific I'm working with systems integration. In a scenario where I need to develop new software from scratch, would it be better to develop this new software using REST APIs? Does anyone have any recommendations about courses?

[#API](#) [#Caché](#) [#Ensemble](#) [#InterSystems IRIS](#)
Product version: IRIS 2021.2
