Meet Weidong Li – New Chinese Developer Community Moderator!

Hey Community,

We're pleased to welcome [@Weidong Li](#) as our new Moderator on the Developer Community in Chinese!

WELCOME
to our Team, Weidong Li!

Let's greet Weidong Li with big applause and take a closer look at his bio!

Weidong Li works as a Manager of Integration Platform Group of Jiahui International Hospital.

Some words from [@Weidong Li](#):

– After joining Jiahui, I started to learn InterSystems technology and integrated platform. I used the early InterSystems Caché, DeepSee, Ensemble, and migrated to the IRIS-based Health Connect platform, and deeply understood the features of these products, and the methodology of building an efficient integration platform based on Health Connect.

– I have more than 16 years of experience in HIT, familiar with IHE/DICOM/HL7 V2/V3, and have rich domain knowledge. I had worked in mainstream HIT companies such as INFINITT, AGFA, Carestream, etc., and had designed and developed various clinical information systems and integration solutions. Currently, I lead a small team, based on Health Connect, to design the underlying architecture of the entire integration platform from zero, including the overall business process, development process, development specifications, release and deployment specifications, third-party system access, operation, and maintenance deployment. The operation, and maintenance monitoring and security architect. Now we have created a safe, efficient, and highly available business platform, connecting clinical applications, non-clinical applications, IoT, and smart hospitals.

– InterSystems provides an excellent integration platform and it brought great convenience to our business. I hope that such excellent technology can create value for more peers and partners. I also hope to communicate with you in the Developer Community and share my experience; at the same time, I also hope to learn your excellent practices. Let's grow together and make progress together!

Warm welcome!

Thank you and congratulations, [@Weidong Li](#)! Hope you will be a great Moderator!
