GlobalToJson-Compact

I have created a package that offers a utility to load a Global into JSON object and reverse to create a Global from this type of JSON object. Compact refers to the structure created. Globals nodes are included with data for a fast data load. But also the related code is quite compact.

The export of this Global

View global in namespace USER:

Global Search Mask:

Search History: Maximum Rows:

1:	<code>^dc.MultiD</code>	= 5
2:	<code>^dc.MultiD(1)</code>	= \$lb("Braam,Ted Q.",51353)
3:	<code>^dc.MultiD(1,"mJSON")</code>	= "{}"
4:	<code>^dc.MultiD(2)</code>	= \$lb("Klingman,Uma C.",62459)
5:	<code>^dc.MultiD(2,2,"Multi","a")</code>	= 1
6:	<code>^dc.MultiD(2,2,"Multi","rob",1)</code>	= "rcc"
7:	<code>^dc.MultiD(2,2,"Multi","rob",2)</code>	= 2222
8:	<code>^dc.MultiD(2,"Multi","a")</code>	= 1
9:	<code>^dc.MultiD(2,"Multi","rob",1)</code>	= "rcc"
10:	<code>^dc.MultiD(2,"Multi","rob",2)</code>	= 2222
11:	<code>^dc.MultiD(2,"mJSON")</code>	= "{\"A\":\"ahahah\",\"Rob\":\"VIP\",\"Rob2\":1111,\"Rob3\":true}"
12:	<code>^dc.MultiD(3)</code>	= \$lb("Goldman,Kenny H.",45831)
13:	<code>^dc.MultiD(3,"mJSON")</code>	= "{}"
14:	<code>^dc.MultiD(4)</code>	= \$lb("", "")
15:	<code>^dc.MultiD(4,"mJSON")</code>	= "{\"rcc\":122}"
16:	<code>^dc.MultiD(5)</code>	= \$lb("", "")
17:	<code>^dc.MultiD(5,"mJSON")</code>	= "{}"

Total: 17 [End of global]

Generates a JSON object that covers all Global nodes

```
USER>write $$Do^ZPretty(json)
{
  "gbl": [
    "^\$dc.MultiD=5",
    "^\$dc.MultiD(1)=$lb(\"Braam,Ted Q.\",51353)",
    "^\$dc.MultiD(1,\"mJSON\")=\"{}\"",
    "^\$dc.MultiD(2)=$lb(\"Klingman,Uma C.\",62459)",
    "^\$dc.MultiD(2,2,\"Multi\", \"a\")=1",
    "^\$dc.MultiD(2,2,\"Multi\", \"rob\",1)=\"rcc\"",
    "^\$dc.MultiD(2,2,\"Multi\", \"rob\",2)=2222",
    "^\$dc.MultiD(2,\"Multi\", \"a\")=1",
    "^\$dc.MultiD(2,\"Multi\", \"rob\",1)=\"rcc\"",
    "^\$dc.MultiD(2,\"Multi\", \"rob\",2)=2222",
    "^\$dc.MultiD(2,\"mJSON\")=\"{ \\"A\\"\": \"ahahah\", \\"Rob\\"\": \"VIP\", \\"Rob2\\"\": 1111, \\"Rob3\\"\": true }\"",
    "^\$dc.MultiD(3)=$lb(\"Goldman,Kenny H.\",45831)",
    "^\$dc.MultiD(3,\"mJSON\")=\"{}\"",
    "^\$dc.MultiD(4)=$lb(\"\", \"\")",
    "^\$dc.MultiD(4,\"mJSON\")=\"{ \\"rcc\\"\": 122 }\"",
    "^\$dc.MultiD(5)=$lb(\"\", \"\")",
    "^\$dc.MultiD(5,\"mJSON\")=\"{}\""
  ]
}
```

And the related Loader creates exactly the same Global
