Using XSLT to add background image

I have a PDF ZEN report module that I'm using XslFoXslt to highlight the table cell.

What I need is for a particular value to add a background image to the <item> that is calling the XSLFoXslt

The code I have is the following but all that happens is the color.

```
XData XslFoXslt
{
  <xsl:template name="HighLight">
  <xsl:param name="Value"/>

  <xsl:if test="$Value = 400">
  <xsl:attribute name='background-image'>url("images/trash-icon.png")</xsl:attribute>
  <xsl:attribute name='background-repeat'>no-repeat</xsl:attribute>
  <xsl:attribute name='color'>#ffffff</xsl:attribute> </xsl:if>

  </xsl:template>
}
```
