How to get current date and time in YYYYMMDDHHMMSS format?

I would like to get current date and time in this format: YYYYMMDDHHMMSS (eg: 20220126155704)

Simplest way to do that I found so far is this :

```
$translate($zdatetime($horolog,8,1), " :", "")
```

It works, but it's not that great (I would like to avoid string manipulation) Is there a better, cleaner way ?
