How to set up IRIS database with Quarkus

Hello Programmers,

I'm trying to use InterSystems IRIS Database with

Quarkus, but I'm getting problems making it work

does anyone knows how to set up the InterSystems IRIS Database on Quarkus ?

I did that on my pom.xml and also I added the jar

hibernate-iris-1.0.0.jar and intersystems-jdbc-3.2.0.jar but it's not working

```
<dependency>
  <groupId>com.intersystems</groupId>
  <artifactId>intersystems-jdbc</artifactId>
  <version>3.2.0</version>
  <scope>system</scope>
  <systemPath>${project.basedir}/src/main/resources/intersystems-jdbc-3.2.0.jar</systemPath>
</dependency>
```

```
<dependency>
<groupId>org.hibernate</groupId>
<artifactId>hibernate-iris</artifactId>
<version>1.0.0</version>
<scope>system</scope>
<systemPath>${project.basedir}/src/main/resources/hibernate-iris-1.0.0.jar</systemPath>
</dependency>
```

This is my application.properties

quarkus:

datasource:

db-kind: other

username: system

password: *****

jdbc:

url: jdbc:IRIS://localhost:1972/USER

driver: com.intersystems.jdbc.IRISDriver

hibernate-orm:

dialect: org.hibernate.dialect.InterSystemsIRISDialect

jdbc:

timezone: UTC
