[Video] Smart Data Services (Vision & Demo)

Hey Developers,

Enjoy watching the new video on [InterSystems Developers YouTube channel](#):

[Smart Data Services \(Vision & Demo\)](#)

Smart Data Services is a glimpse into the near future! Come and see what this is about, why it is needed and how it is being implemented. We will talk about how you can package applications so they can be listed on an “ App Store ” , how we are using Kubernetes to support it on-prem and in the cloud, some concepts of this platform such as endpoint dependency injection and a nice demo. The demo will show us picking applications from a catalog and deploying them using an easy-to-use App Store. We will show how services can be combined in order to build a data fabric. It has never been this easy!

Presenters:

[@Amir Samary](#), Director, Solution Architecture, InterSystems
Michael Hom, Financial Solutions Executive, InterSystems

Enjoy and stay tuned!
