Reading the header information from a SOAP outbound adapter call

After invoking a SOAP call in a SOAP Outbound Adapter Operation, how do we get the header information? For example, the HTTP 200 response code.

In SoapUI we can read the header information, but we're trying to view it in Production.

Header	Value
Cache-Control	no-cache
Server	██████████
Content-Encoding	gzip
Set-Cookie	████████████████████████
Set-Cookie	████████████████████████
Pragma	no-cache
Expires	Thu, 29 Oct 1998 17:04:19 GMT
#status#	HTTP/1.1 200 OK
Content-Length	363
Date	Wed, 16 Feb 2022 13:27:09 GMT
Content-Type	text/xml; charset=UTF-8
X-Powered-By	██████
