[Video] Creating Virtual Models with InterSystems IRIS Adaptive Analytics

Hey Community,

Enjoy watching the new video on [InterSystems Developers YouTube channel](#):

[Creating Virtual Models with InterSystems IRIS Adaptive Analytics](#)

See how InterSystems IRIS Adaptive Analytics lets you quickly and easily create virtual data models, helping you make better business decisions. Adaptive Analytics includes built-in AI to improve query speed based on common requests by automatically creating data aggregates. Business users and analysts can access data using their business intelligence tool of choice.

Stay tuned!
