[Video] Working with ObjectScript Classes in VS Code for Client Side Editing

Hey Community,

Don't miss the new video on [InterSystems Developers YouTube channel](#):

[Working with ObjectScript Classes in VS Code for Client Side Editing](#)

Learn the basics of working with InterSystems ObjectScript classes in Visual Studio (VS) Code and create new classes in the VS Code Explorer using code completion. Perform basic operations such as save, compile, export, and import, and adjust the behavior of these operations.

Enjoy watching and stay tuned!
