Duplicate Resource/Data added in FHIR Repository

If I add the same patient data with a different unique ID then it inserts as new data using a POST request.

So, In the FHIR server How can I prevent this kind of thing by using POST requests?

Note:- I don't want to use a PUT request for the same. The main thing is I want to get a unique patient record.

Que:- Is there any way to check data duplication on each FHIR resource?

Thanks & Regards,

Harshdeep Acharya
