How to make my webpage (csp page) unauthenticated

I have created person.csp in my namespace using studio and view->webpage then web page opened in below url

<http://localhost:52773/csp/healthshare/pponugotins/person.csp>

I have crated new web application as /csp/test. only change is selected unauthenticated

<http://localhost:52773/csp/test/person.csp>

it should open same webpage , but showing "Invalid Action"

please help me what should i do.

I need a csp page which should not ask any authentication

Thanks,

Prashanth
