Maintenance releases for Caché, Ensemble, and InterSystems IRIS are Generally Available

NOTE: we previously found an issue with the 2021.1.1.324.0 builds. The 2021.1.1 maintenance releases have been removed from the WRC and have been replaced with 2021.1.2.336.0 builds. 2021.1.2 containers will be available shortly.

Two new sets of maintenance releases are now available:

- Caché 2018.1.6, Ensemble 2018.1.6, and HSAP 2018.1.6
- InterSystems IRIS 2020.1.2, IRIS for Health 2020.1.2, and HealthShare Health Connect 2020.1.2

Installation kits and containers can be downloaded from the [WRC Software Distribution site](#). Container images for the Enterprise Editions of InterSystems IRIS and IRIS for Health and all corresponding components are available from the [InterSystems Container Registry](#).

These are maintenance releases with many updates across a wide variety of areas. For information about the corrections in these releases, refer to the documentation for that version, which includes a Release Notes and Upgrade Checklist, and a Release Changes list, as well as the Class Reference and a full set of guides, references, tutorials, and articles. All documentation can be reached via docs.intersystems.com.
