Complex Record Map with no Leading Data in body records

The Complex Recordmapper specify a map for headers, body, and trailers, but it expects all three to have fixed Leading Data to identify the record type. But what if the Header and Trailer have Leading Data, but not the body records? I can't seem to find a way to do this. For example:

```
HEADER|194|2012|Fall|20  
12345|Adams|John|Michael|2|john.michael.adams@example.com|617-999-9999  
12347|Jones|Robert|Alfred|1|bobby.jones@example.com|  
TRAILER|8|100
```

Ideas?
