## How to get Script execution result in CMD caller

Hello

I am running a script from a CMD command line using : `C:/CacheSys/Bin/cterm.exe /console=cnip tcp:127.0.0.1[23] myscript.SCR %CD%`

The script should authorize something (or not) in the following lines of the GO.CMD

But How can i return an information from inside the script to the GO.CMD script ?

Any idea ?
