## Conversion of .rtf documents to HL7 (Not embed)

Hi everyone,

Does anyone have any experience / examples of converting an .rtf file into an HL7 message (ORU^R01). My example is a histology report which is placed on a server to pick up and then convert if possible for downstream systems who receive HL7.

Struggling to find any sort of examples or even whether its feasible at this stage - there are certainly better knowledged people on here than me so thought id ask.

With thanks

Warren
